

Introduction

Veethree's DAC converts digital output of new NMEA 2000 outboard engines to analog signals. Highlights include:

- Converts digital output of NMEA 2000 engines to analog signals
- Eliminates need to replace current analog gauges
- DAC will work with engines from Yamaha, Honda, Suzuki and BRP (Johnson/Evinrude)
- Designed to operate on 12 V DC systems
- Kit includes: DAC unit, mating Krimptite plugs and installation instructions

Part number: 70198E

Technical Information

Wiring Colors Reference

Light Blue	Oil Pressure Gauge	Yellow/White	Trim Gauge (Suzuki)
Tan	Water Temp Gauge	Gray	Tachometer Gauge
Green/White	Trim Gauge (Yamaha)	Yellow/Blue	Trim Gauge (Honda)
Black/White	Warning 1 (Low Oil)	Black/Yellow	Warning 2 (Engine Overheat)
