

em-trak A200 SERIES

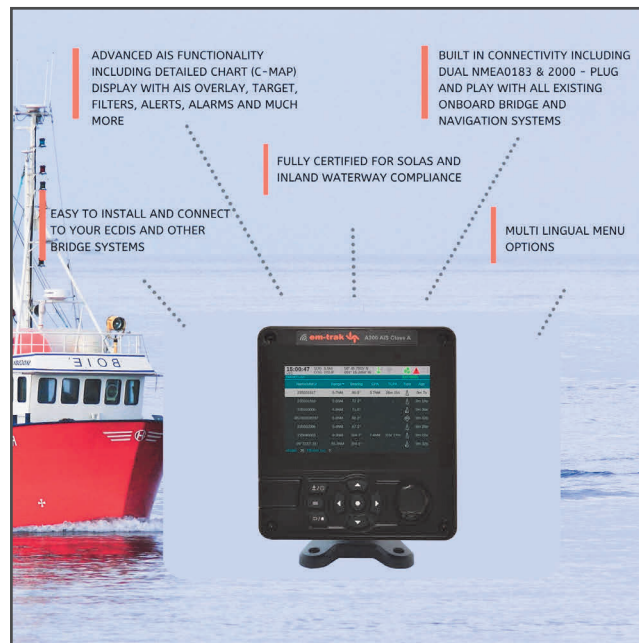

High Performance Class A AIS

The A200 Class A is both SOLAS and Inland Waterway certified and offers superior performance through its advanced, next-gen technology.

It is engineered for even the harshest marine to ensure it is waterproof and unaffected by extreme temperatures, shock and vibration, so you don't need to worry about reliability issues impacting performance or longevity.

The A200 is easy to install and will seamlessly connect to your ECDIS and other bridge systems. The A200 delivers comprehensive AIS functionality, such as alerts, target filters, vessel information lists, real time weather and more.

With its integrated color display, the A200 plays an important role in tracking, collision avoidance and CPA when vessels are in busy port areas. The combination of advanced performance, trusted reliability and competitive price make the A200 the best value AIS Class A in the market by far.

FEATURES
